

Needle Holders

(shown 50% actual size, unless noted)

Nordent stainless steel needle holders are hardened to the highest degree to assure a firm, long lasting gripping action at the tip of the jaws. The serrations are machined using a special process to reduce micro-fractures that can result in premature wear. All sharp edges are removed from the surfaces of the hinge area to eliminate snagging the suture during the procedure.

Stainless Steel Jaws

Castroviejo #209 Very fine serrations on narrow profile jaws. The locking mechanism is activated by squeezing the spring-action handle. This is a great needle holder for periodontal applications where a very fine suture is used. (5" / 130mm)

NH209 (actual size)

Mayo-Hegar #202
Large jaws with fine serrations. (6-1/2" / 160 mm).

NH202

Crile-Wood #204
Medium jaws with fine serrations. (6" / 150 mm).

NH204

Mathieu #207
Medium jaws with a unique ratchet mechanism allows the instrument to be locked and opened by simply squeezing the handles. Excellent for left handed operation. (5"/130 mm).

NH207

Derf #206
Medium jaws with fine serrations. (5" / 130 mm).

NH206

Nordent Tip Our Professional Sharpening Service can give your worn out needle holders a better grip! We re-serrate stainless steel jaws and replace worn carbide jaws on ANY BRAND of Needle Holders for a nominal fee.

Visit www.nordent.com and click "Sharpening Service" for more information.

Needle Holders

(shown 50% actual size, unless noted)

Nordent carbide needle holders can be identified by gold handles. They are an excellent choice for those practices that have a high volume of surgical procedures. The jaws have carbide inserts and fine serrations that are machined into the carbide for added strength and durability. All sharp edges are removed from the surfaces of the hinge area to eliminate snagging the suture during the procedure.

Carbide Jaws

Castroviejo #208 Very fine serrations on narrow profile jaws with carbide inserts. The locking mechanism is activated by squeezing the spring-action handle. This is a great needle holder for periodontal applications where a very fine suture is used. (5" / 130mm)

NH208 (actual size)

Mayo-Hegar #201 Large jaws with carbide inserts and fine serrations. (6-1/2" / 160 mm).

NH201

Crile-Wood #203 Medium jaws with carbide inserts and fine serrations. (6" / 150 mm).

NH203

Mathieu #207C Medium jaws with carbide inserts and fine serrations. The unique ratchet mechanism allows the instrument to be locked and opened by simply squeezing the handles. Excellent for left handed operation. (5"/130 mm).

NH207C

Derf #205 Medium jaws with carbide inserts and fine serrations. (5" / 130 mm).

NH205

Mayo-Hegar #213 Large jaws with carbide inserts and fine serrations. (7" / 180 mm).

NH213
